

Too good to be true?

- 50 litres/hour flow
- 20 metres head
- 7m suction lift/self priming
- ultra reliable – multi year warranty
- whisper quiet
- slimline/lightweight
- integral failsafe alarm

MegaBlue has the performance to overcome installation difficulties – just plug and play, fit and forget.

Proven in service the revolutionary patented principle makes it inherently reliable and is backed by our multi year warranty. Who else offers that?

You can prevent call-outs to stalled or clogged mini pumps and forget servicing split peristaltic tubes and worn gearboxes.

With new low cost MegaBlue there's no cost penalty up front but big savings on installation and in service beyond.

Keep in the van to keep out of trouble.

BlueDiamond – why risk anything else?

MegaBlue options

reservoir sensing
with alarm contacts

temperature sensing

DrainStik™

Application Ideas

Performance/Technical

Specifying MegaBlue

Option 3

Siting - Installation Possibilities

Revolutionary pumping principle

Exceptional performance from a small package:-

Flow rate up to 50 litres/hour

Max head 20 metres+ (pumps up 6 storeys!)

Dry suction lift up to 7 metres - self priming

Very quiet and low vibration

Power supply 230V/115V - Internally transformed to 12V

Thermally protected pump

Pump kit - Complete with in and out tubing and connections, anti vibration feet and mountings, integral volt free alarm module and 3 core power cord (2m)

Sensing choices - choose either

Option 1 - Reservoir Sensor (energy efficient) - Connect drip tray to reservoir in which the presence of condensate trips the hi-low solid state level sensors to switch pump on/off. Runs pump only when condensate produced. Alarm shuts off A/C in fault mode, restarts when clear.

Option 2 - Hot and Cold sensor - Hot-cold thermistors mounted in air inlet and outlet of room unit sensing when cooling occurs. Runs pump constantly when A/C "on" regardless of whether producing condensate. Failsafe circuit inactive.

Option 3 - DrainStik™ (energy efficient) - The patented DrainStik™ is quick and simple to install or retrofit around any existing installation. The slim line probe, which houses the water sensors and high level alarm can be directly mounted into the drain tube of all types of equipment. With no moving parts to become clogged or stuck it is an ideal alternative to existing float switches.

① inside trunking ② above ceiling ③ remote

MegaBlue pump is slim enough to fit into trunking, powerful enough for distant location and quiet enough for ceiling mounting. It's your choice. Commissioning is so easy, link pump to sensing option with single wire DIN plug and connect in/out tubing provided - plug and play, fit and forget!

Patented rotary diaphragm pump

Making all these advantages possible is our advanced rotary diaphragm technology. The condensate is drawn into the pump by vacuum then mechanically driven within a re-inforced elastomer diaphragm to the outlet under pressure. This system even tolerates suspended solids and light slurries and also happily runs dry.

MegaBlue - All the reliability with extra performance
